login with admin, project manager and contractor

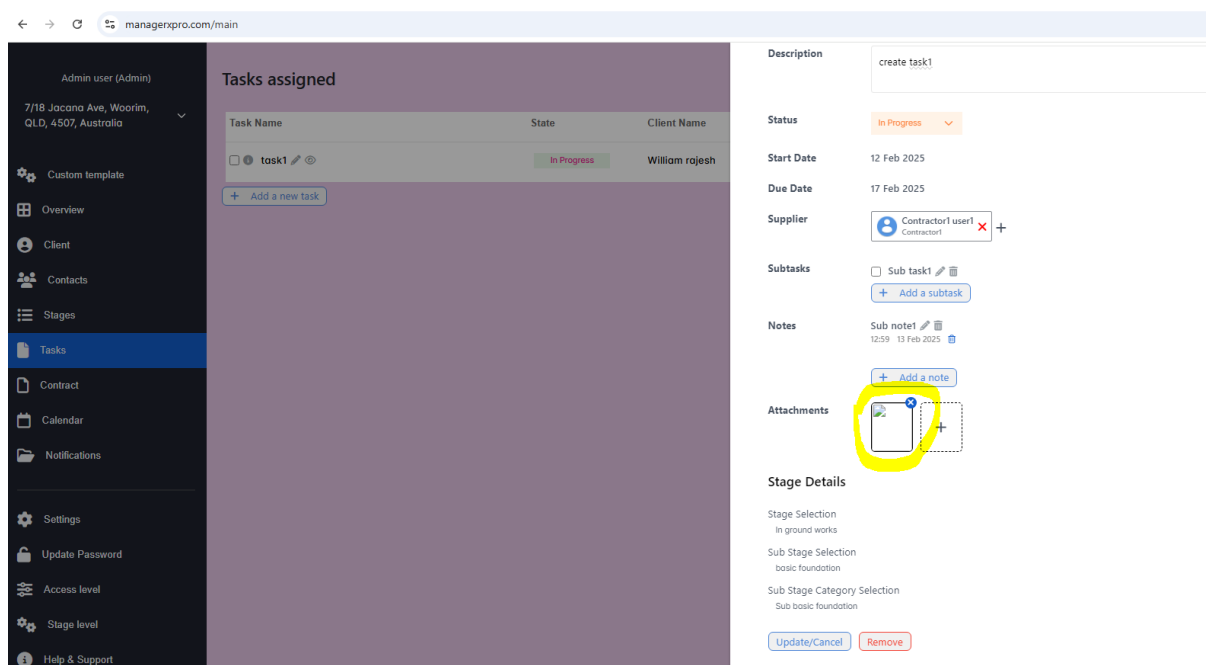

Testing date – 13/02/2025

Task

1. Creating tasks by adding attachments then move to edit or view tasks, not display attachments.

When task view by contractor, not display attachments.

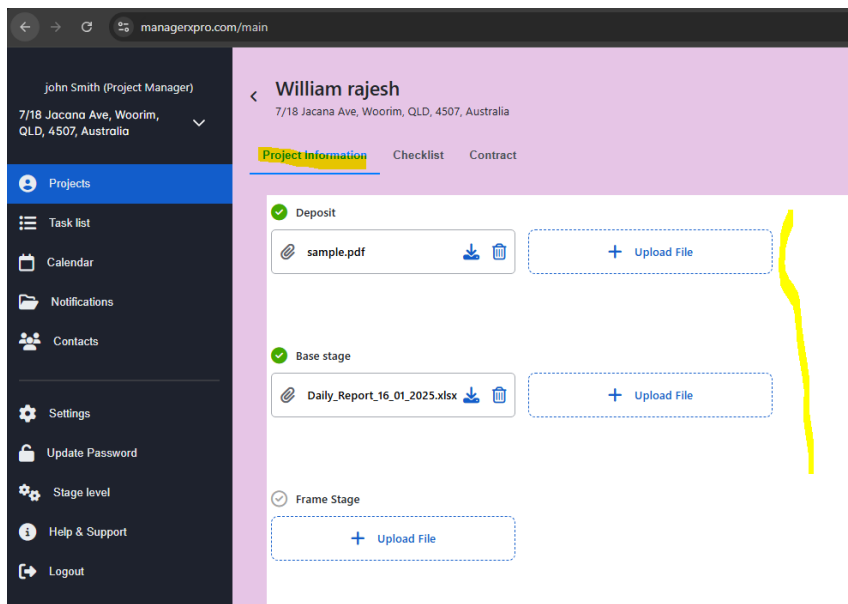

(Task created by admin or project manager)

2. Login as project manager -> Select project -> Move to contract

Then back from the project and again move to this project, highlighted as project information but display contract list.

(this issue mentioned previously inside bug report)

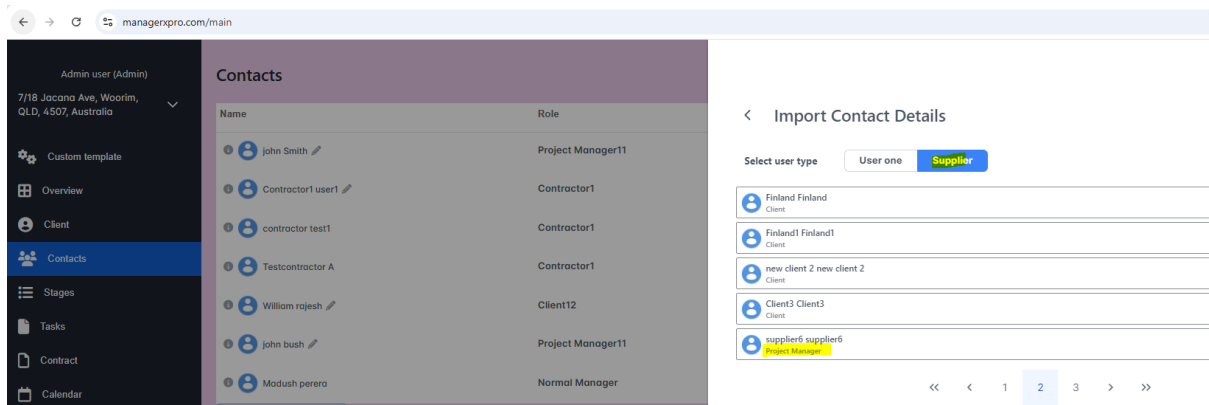

3.Contacts->Import contacts

(this issue mentioned previously inside bug report)

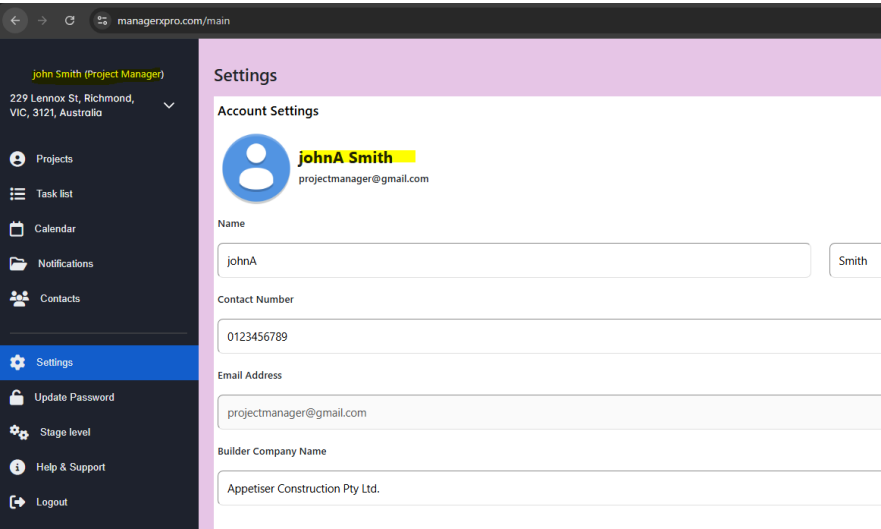

Move to import contacts for contractors, display project manager details and import contacts for project manager , display clients details.

(It happens when login as admin and project manager)

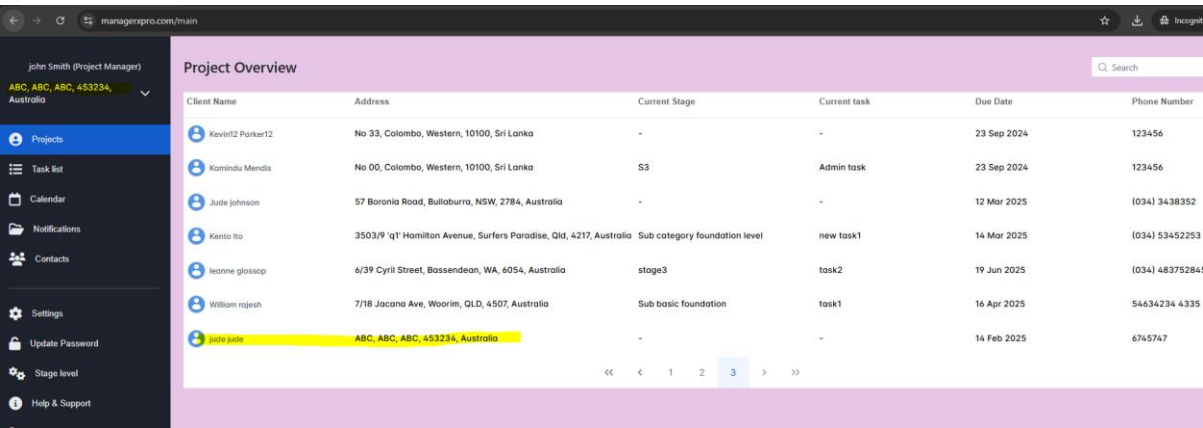

4.Login as Admin, project manager or contractor then update their name from settings but it not update on top of left side menu bar.

After relogging also it not update.

5. Create a client(project) with login as admin
then import contacts as project manager and contractor
then remove this client(project) so it removed from client list (Login as admin)
But it displays when login as project manager and contractor.
(this issue mentioned previously inside bug report)

6. Create an account – When creating admin account with entering street name, it displays as follows. There is a style issue.

(this issue mentioned previously inside bug report)

< Complete your profile

7.

7.1 Create an account for admin

then login to the system with this admin then update password then log out from the system.

Again, trying to login to the system with updated password, display message as invalid password so can't login.

(Old and new password not works)

7.2 Create an admin account for my email (dilki@iitcglobal.com), when updating password, not display email for this account.

8. Create an account - Create an account using already existing email.

9.

9.1 Creating a new contractor then assigning this contractor to the project

and login as this contractor, display contacts, notifications detail according to the selected project

But not display tasks list, calendar for selected project. (Selected project include tasks list)
